Product Overview

Professional Ventilation Solution

This semi-rigid aluminum flexible duct is engineered specifically for top-sucking range hoods, offering a durable and corrosion-resistant ventilation solution. Its unique machine-fabricated lock seam allows for extensive bending and compression without leakage, delamination, or dry rot. Designed for efficient installation, the duct maintains an unrestricted diameter even with severe bends, making it ideal for both residential and commercial kitchen environments.

Technical Specifications

Available Lengths

- 5 foot
- 10 foot
- 15 foot

Material	Special aluminum alloy
-----------------	------------------------

Compression Ratio	3 x
--------------------------	-----

Key Features

Installation Benefits

Easy Installation • Tight Space Compatible • Unlimited Lengths • Severe Bend Capable

Performance Features	Corrosion Resistant, Heat Aged Resistant, Leak Proof, Flexible
-----------------------------	--
