

Flexible COB LED Strip Light

This flexible COB LED strip light provides continuous, dot-free illumination. It is available in 5mm, 8mm, and 10mm widths and operates on 12V or 24V with 280, 352, or 512 LEDs.

Product Overview

Flexible COB LED Strip Light

This flexible COB LED strip light offers a superior lighting solution with its linear, dot-free luminescence and 180-degree beam angle. Utilizing an advanced inverted LED chip packaging process, the strip is welded directly to the circuit board for enhanced heat dissipation and stable, long-lasting performance. Its ultra-thin, flexible design allows for arbitrary distortion, making it ideal for versatile accent, decorative, and general illumination requirements.

Technical Specifications

Beam Angle	180 °
Operating Voltage	DC12V

Key Features

Performance Highlights

180 °

Luminescence Angle

0 N/A

Light Spots

Core Advantages

- Linear luminescence with soft, dot-free light
- High brightness and high color indication
- Excellent heat dissipation via inverted chip packaging
- Ultra-thin and flexible body for easy installation
- Stable performance with long lifespan
