

Flexible LED Strip Light

This flexible LED strip light is encased in a protective translucent tube with closely spaced LEDs. It provides continuous, even illumination suitable for accent, decorative, and signage applications.

Product Overview

Flexible LED Strip Light

This flexible LED strip light features closely spaced LEDs encased in a protective translucent tube, designed to provide continuous and even illumination. It is an energy-efficient lighting solution suitable for a wide range of applications, including accent lighting, decorative displays, and signage. The strip is engineered for easy installation and can be cut to custom lengths to fit specific project requirements.
