Product Overview

Flexible PVC Ventilation Ducting System

This professional-grade ventilation duct set is engineered for efficient air distribution in confined spaces such as industrial work sites, cabins, and warehouses. Constructed from fire-resistant, durable PVC laminated fabric and supported by helix steel wire, the system is designed to connect seamlessly with air heaters, coolers, or industrial fans. The modular design, featuring a main duct with multiple distribution branches, allows for flexible and customizable airflow configurations to meet specific site requirements.

Technical Specifications

Main Duct Diameter	710 mm
Distribution Duct Diameter	300 mm
Max Temperature Resistance	150 °
Material Characteristics	Fire-resistant, Acid-resistant, Alkali-resistant, Wear-and-tear proof

Design & Features

Available Colors

Yellow • Orange

Hanging Configuration	3 rings every 1 meter (positioned at 9, 12, and 3 o'clock)
Outlet Configuration	7 to 8 outlets on main duct; includes 3-4 covers for unused outlets

Logistics & Ordering

Customization

- OEM Service available
- Custom sizes available upon request
- Small test orders accepted

Minimum Order Quantity	50
Payment Terms	50% deposit, 50% balance before shipment
