

Flexible Surface Polishing Pads

These flexible pads are designed for polishing various surfaces to a smooth finish. They are suitable for use on materials like stone, concrete, and tile.

Product Overview

Flexible Surface Polishing Pads

These flexible polishing pads are engineered for versatile surface finishing applications, providing a smooth and refined result on diverse materials. Their flexible design is specifically optimized for easy contouring, making them ideal for polishing curved surfaces. With a range of grits available, from coarse to fine, these pads offer a comprehensive solution for stone, concrete, and tile finishing projects.

Technical Specifications

Key Features

- Flexible design for curved surfaces
- Variable grit options
- Coarse to fine finishing capability

Application

Surface Polishing • Surface Finishing

Compatible Materials

Stone, Concrete, Tile
