Product Overview

Flexible Warm White COB LED Strip

This flexible LED strip light delivers uniform warm white illumination, utilizing advanced chip-on-board (COB) technology to eliminate visible light dots. Engineered for superior durability, it features high bending resistance and efficient heat dissipation, making it suitable for complex installations. With multiple width options and IP protection ratings, this strip is a versatile solution for architectural, decorative, and accent lighting projects.

Technical Specifications

Operating Voltage

24 V DC
Voltage

Available Widths

- 4mm
- 8mm
- 10mm

IP Ratings

IP20 • IP67

Key Features

Performance Highlights

High Bending Resistance, Uniform Lighting, Dot-Free Illumination, Enhanced Heat Dissipation, Flexible Substrate
