

Float Ball Valve with Brass Body

This float ball valve is designed for controlling liquid levels in tanks and vessels. The valve uses a buoyant ball to open or close, maintaining a desired liquid level.

Float Ball Valve	
Code	Spec.
G00013	1/2" High Pressure Part 2 Brass
G00014	3/4" High Pressure Part 2 Brass
G00015	1/2" Low Pressure Part 2 Brass
G00016	3/4" Low Pressure Part 2 Brass

Product Overview

Professional Float Ball Valve Solution

This float ball valve is engineered for precise liquid level control in tanks and reservoirs, utilizing a reliable buoyant ball mechanism for automatic shut-off. Constructed with a durable brass body, it offers excellent corrosion resistance and long-term reliability for industrial and plumbing applications. Available in multiple configurations, including high and low-pressure models, to suit diverse operational requirements.

Technical Specifications

Pressure Options

- High Pressure
- Low Pressure

Model Configurations

Code	Size	Pressure Type
G00013	1/2"	High Pressure
G00014	3/4"	High Pressure
G00015	1/2"	Low Pressure
G00016	3/4"	Low Pressure

Connection Sizes 1/2 inch, 3/4 inch

Material Part 2 Brass

Features

Key Features

Corrosion Resistant • Automatic Shut-off • Green Manufacturing • Durable Brass Body
