Product Overview

Reliable Liquid Level Management

This float switch liquid level controller is designed for precise and dependable level detection in tanks, wells, and various liquid storage systems. It features a robust construction with an adjustable cable length and weight system, ensuring accurate on/off control for pumps, valves, and alarm systems. The unit is built for durability and reliable operation in demanding environments.

Technical Specifications

Rated Current

16 A

Resistive Load

6 A

Inductive Load

Ingress Protection

IP 68

Voltage Rating

250 V
