Product Overview

High-Efficiency Floor Decking Production

This floor decking roll forming machine is engineered for cost-effective, high-precision manufacturing of construction-grade decking profiles. Designed with advanced German COPRA software, the system ensures smooth operation, low noise output, and exceptional durability. It features robust construction and high-quality electrical components to support long-term industrial performance.

Technical Specifications

Expected Service Life	10 years
Roller Material	Cr40 Steel with Heat Treatment
Roller Hardness	HRC 60-62
Electrical & PLC Brands	Mitsubishi, Schneider, Omron

Logistics & Ordering

Available Colors

Blue • White • Customized

Production Lead Time	90 days
Payment Terms	T/T
Shipping Port	Any Port in China

Compliance & Warranty

Warranty	Lifetime Limited Warranty / 10-Years
