

Floor Decking Sheet Roll Forming Machine

This floor decking sheet roll forming machine is designed for efficient and precise production. It features a robust construction with heavy-duty rollers and forming stations to ensure consistent and accurate sheet profiles.

Overview

High-Efficiency Floor Decking Production

This industrial-grade roll forming machine is engineered for the precise and efficient production of 750-type floor decking sheets. Designed for heavy-duty manufacturing, it handles raw material widths of 1000mm to produce consistent, high-quality profiles with a finished cover width of 750mm. The machine features a robust dual-motor configuration and integrated hydraulic systems, ensuring reliable performance for material thicknesses ranging from 0.8mm to 1.2mm.

Technical Specifications

Input Material Width	1000 mm
Finished Cover Width	750 mm
Compatible Material Thickness	0.8 - 1.2

Power and Mechanics

Main Motor Power

11 KW

Motor 1

11 KW

Motor 2

Hydraulic Station Power	7.5 KW
-------------------------	--------

Dimensions and Weight

Total Machine Weight	13.3 Tons
Dimensions (LxWxH)	13000 x 1600 x 1500 mm

Roller Details

Roller Specifications

Component	Diameter	Unit
Roller Shaft	90	mm
Roller Mould	165	mm
