

Floor-Standing Drill Press for Precision Drilling

This floor-standing drill press is designed for precision drilling in various materials. It features a sturdy base, adjustable worktable, variable speed motor, chuck, and depth stop, making it ideal for woodworking, metalworking, and general fabrication tasks.

Overview

Precision Drilling Performance

This floor-standing drill press is engineered for high-precision drilling tasks across a wide range of materials. Featuring a robust, stable base and an adjustable worktable, it accommodates diverse workpiece sizes with ease. With a variable speed motor and integrated depth stop, it provides the consistent control necessary for professional woodworking, metalworking, and fabrication projects.

Technical Specifications

Suitable Applications

- Woodworking
- Metalworking
- General Fabrication
