

Floor-Standing Home Theater Speakers

These floor-standing speakers are designed for high-fidelity audio reproduction. The multi-driver configuration, including woofers and tweeters, delivers balanced sound, while the cabinet minimizes resonance and distortion.

Product Overview

High-Fidelity Floor-Standing Speakers

These floor-standing speakers combine classic design with advanced audio engineering to deliver a balanced and immersive sound experience. Featuring a slender black walnut wood cabinet and a distinctive curved metal net cover, they offer a sophisticated aesthetic suitable for any home theater or audiophile setup. The multi-driver configuration ensures clear, accurate audio reproduction across a wide frequency range.
