

Floor-Standing Metal Drilling Machine

This floor-standing drilling machine is designed for precision drilling operations in metalworking. It features an adjustable worktable, multi-speed motor, control panel, emergency stop button, and an integrated coolant system with a transparent shield.

Product Overview

High-Precision Floor-Standing Metal Drilling Machine

This robust floor-standing drilling machine is engineered for precision metalworking and industrial applications. Featuring a 12-step spindle speed range and a high drilling capacity of 50mm, it offers the versatility needed for diverse machining tasks. The integrated coolant system and adjustable worktable ensure efficient operation and flexibility for various workpiece sizes.

Key Performance Metrics

Performance Highlights

50 mm

Drilling Capacity

27 mm

Tapping Capacity

2.2 kW

Motor Power

Technical Specifications

Spindle Speed Steps	12
Spindle Speed Range	52-1400 rpm

Worktable & Construction

Design Features

- Adjustable height and position worktable
- Robust blue base and gray drilling head
- Top-mounted multi-speed motor
- Integrated coolant system

Worktable Size	570 x 460 mm
----------------	--------------

Safety & Control

Safety and Controls

- Large emergency stop button
- Transparent coolant shield for operator protection
- Multi-switch control panel

Certifications

CE

Physical Dimensions

Overall Dimensions (LxWxH)	940 x 680 x 2405 mm
Gross Weight	675 kg
