

Floral Snips with Spring Assist

These spring-assisted floral snips are designed for precise and effortless cutting of flowers and delicate stems. The tool features sharp, pointed blades crafted from hardened steel for durability and clean cuts.

Product Overview

Precision Floral Snips

These spring-assisted floral snips are engineered for precise and effortless cutting of flowers and delicate stems. Featuring sharp, hardened steel blades, they ensure clean cuts while the ergonomic handle design minimizes hand fatigue during prolonged use. The integrated spring mechanism automatically reopens the blades after every snip, significantly increasing workflow efficiency for florists, gardeners, and hobbyists.
