

# Flour Milling Machine

This machine grinds grains into high-nutrient flour, adjustable from 10-100 mesh. It ensures minimal residue and high success rates.

## Product Overview

### High-Efficiency Flour Milling Solution

This industrial-grade flour milling machine is engineered for producing full nutrition flour by processing various grains effectively. It features an advanced water-cooling system and integrated cyclone separator for efficient dust collection and clean air exhaust. Designed for versatility, it handles unlimited feed-in granularity and moisture content, making it an ideal choice for professional milling operations.

## Performance Metrics

### Key Performance Metrics

Model	Power (kW)	Speed (/min)	Weight (kg)
300	5.5	3860	400
400	11	2900	600
500 (Water-cooling)	15	2900	900
700	22	2400	1200
800	30	2200	1500

## Technical Specifications

### Dimensions (m)

- Model 300: 2.8 x 0.6 x 1.9
- Model 400: 4 x 1 x 2.4
- Model 500: 4 x 1 x 2.5
- Model 700: 4.8 x 1 x 2.6
- Model 800: 5 x 1 x 2.65

Thin Degree (Eye)	10-3000
Feed-in Granularity	Unlimited
Water Content Tolerance	Unlimited
