

Flow Sensor for Industrial Machinery

This flow sensor is designed for precise flow measurement in industrial applications. It is an original replacement part.

Product Overview

Precision Flow Sensing for Industrial Machinery

This high-precision flow sensor is engineered for reliable performance in demanding industrial environments. Designed as a direct replacement component, it ensures consistent flow measurement accuracy critical for machine operation. Its robust construction supports seamless integration into existing machinery setups, maintaining operational efficiency.

- G
- 00108 5
- 100817

Part Number	N510054835AA
Component Type	Flow Sensor
Compatibility	Industrial Machinery, Replacement Part
