

Flue Exhaust Gas Water Heater with Floral Design

This flue exhaust gas water heater features a floral design. It provides on-demand hot water by utilizing a flue to vent exhaust gases.

Product Overview

Elegant and Efficient Hot Water Solution

This flue exhaust gas water heater combines functional reliability with a stylish floral design, featuring a durable glass panel that elevates the aesthetics of any indoor installation. Engineered for safety and performance, it includes advanced features like a copper water valve, large burner row, and a comprehensive suite of protective sensors. The integrated LED display and seasonal switching capabilities offer users intuitive control and energy-efficient operation.

Key Features

Core Components

- Glass panel front with floral design
- Copper water valve
- Double ignition pin
- Big solenoid valve
- Large burner row
- Metal frame construction

Safety & Control

User Interface

LED Display • Summer-Winter Switch

Safety Protections

Overvoltage Protection, Over Water Pressure Protection, Overheating Protection, Down-draught Protection, Flameout Protection, Frozen Protection, Flue-blocked Sensor
