

# Fluid and Gas Meter

This meter accurately measures the flow rates of both liquids and gases. It is designed for use in industrial environments to monitor fluid and gas consumption.

## Product Overview

### Industrial Fluid and Gas Metering Solution

This high-precision fluid and gas meter is engineered for demanding industrial environments, including chemical plants and refineries. Designed for seamless integration into continuous flow systems, it ensures accurate measurement and process control. Its robust construction provides excellent durability and resistance to corrosive substances, making it a reliable choice for complex separation and purification workflows.

## Technical Specifications

### Environmental Compatibility

Corrosion Resistant • High-Pressure Rated

<b>Application Suitability</b>	Chemical Processing, Refinery Operations, Liquid Flow Monitoring, Gas Flow Monitoring
<b>Construction Material</b>	Industrial-grade metal (Stainless steel or aluminum alloy)
<b>Installation Type</b>	In-line continuous flow integration
