

Fluid Check Valve

This fluid check valve allows flow in one direction. It prevents backflow in pipelines and systems.

Product Overview

Heavy-Duty Safety Solution

These heavy-duty wheel chocks are engineered to prevent vehicle movement during maintenance, loading, or parking operations. Constructed from durable rubber, they provide reliable stability for a wide range of vehicles, including trucks, trailers, and heavy equipment. The design incorporates high-visibility yellow reflective stripes for enhanced safety in low-light environments, while the textured surface ensures maximum grip.

Technical Specifications

Material	Durable Rubber
Safety Features	Reflective Stripes, High-Visibility, Textured Surface

Compatibility

Suitable For

- Trucks
- Trailers
- Heavy Equipment

Usage

Primary Applications

Maintenance • Loading • Parking
