Product Overview

Industrial Fluid Control

This high-quality ball valve is engineered for reliable flow control in demanding industrial applications. Featuring a robust, multi-piece body construction, it is designed to handle both liquids and gases with ease. The integrated manual lever handle provides clear visual indication of the valve's status, ensuring safe and efficient operation in piping systems.

Technical Specifications

Suitable Applications

- Industrial fluid control
- Liquid flow management
- Gas flow management
- Plumbing systems

Key Design Features

Robust construction • Multi-piece body • Clear visual status indicator • Easy installation

Connection Type

Threaded

Operation

Manual lever handle

Material Composition

Stainless Steel, Brass
