

Fluid Dispensing Nozzle

This precision-engineered nozzle is designed for fluid dispensing applications. Constructed from durable stainless steel, it features multiple orifices for uniform distribution and a flanged base for secure mounting.

Product Overview

Precision Fluid Dispensing

This precision-engineered nozzle is designed for high-accuracy fluid dispensing applications across industrial and scientific processes. Constructed from durable stainless steel, it features a streamlined body with a tapered tip to ensure controlled and uniform flow. The design includes multiple orifices for consistent distribution and a flanged base for secure, reliable mounting.

Compatibility

2-Stroke Engine Compatibility

S26MC, L35MC, S35MC, L42MC, S42MC, S46MC-C, L50MC, S50MC/-C, L60MC, S60MC/-C, L70MC, S70MC, L80MC, S80MC, K80MC/-C

4-Stroke Engine Compatibility

L16/24, L20/27, L23/30, L23/30A, L28/32, L28/32A, L28/32H

Design Features

Design Characteristics

- Streamlined body
- Tapered tip
- Multiple orifices

Material

Stainless Steel

Mounting

Flanged base
