

Fluid-Filled Industrial Lighters

These fluid-filled lighters are designed for industrial use. With various colored fluids, the lighters can be used for thread burning or material testing.

Product Overview

Industrial Fluid-Filled Lighters

These industrial-grade lighters feature a distinct transparent body design filled with vibrant colored fluids, allowing for quick visual identification. Designed for professional use, they are ideal for applications such as textile manufacturing, thread burning, and precision material testing. The durable rectangular construction with a metallic top ensures a reliable performance in demanding industrial environments.

Technical Specifications

Design Characteristics

- Transparent body for fluid monitoring
- Durable metallic top casing
- Ergonomic rectangular shape
