Product Overview

Versatile Fluid Transfer Solution

This professional-grade siphon and air pump kit offers a reliable method for transferring various fluids including oil, gasoline, water, and antifreeze. Designed for efficiency and cleanliness, the kit features oil and acid-resistant construction to handle hazardous liquids safely. Its multifunctional design allows it to serve as both a fluid transfer pump and an inflation tool, making it an essential addition to any automotive, marine, or household maintenance toolkit.

Technical Specifications

Included Hoses

- 1 x Dipstick tube: 120cm length, 4/6mm diameter
- 2 x Red transfer hoses: 130cm (50 inches) length, 9/12mm diameter

Compatible Applications

Oil, Gasoline, Water, Fuel, Antifreeze, Coolant

Inflation Uses

Inflatables, Sports balls, Beach balls, Bicycle tires

Construction & Logistics

Material Characteristics

Oil Resistant • Acid Resistant

Packaging

Double blister pack
