

Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for fluid transfer applications. It features a robust construction with a blue pump housing connected to an electric motor and is mounted on a sturdy base.

Overview

Industrial Fluid Transfer Solution

This centrifugal pump is engineered for reliable and efficient fluid movement in demanding industrial environments. Featuring a robust blue-painted housing and a durable electric motor, the unit is mounted on a sturdy base to ensure stability during operation. It is an ideal choice for facilities requiring consistent performance in fluid transfer applications.

Technical Specifications

Application Suitability

Industrial Use • Fluid Transfer

Design Type

Centrifugal Pump

Construction Features

Robust Housing, Coupled Motor, Sturdy Base Mount
