

Fluid Transfer Water Pump

This high-performance water pump is designed for efficient fluid transfer. It features a robust construction for durability and reliability in demanding applications.

Product Overview

High-Performance Fluid Transfer

This self-priming centrifugal pump is engineered for reliability and high-capacity fluid transfer. Featuring a simple, durable, and lightweight design, it eliminates the need for a foot valve, simplifying installation and operation. It is an ideal solution for water supply and drainage requirements across industrial, agricultural, and construction sectors.

Technical Details

Pump Type	Self-priming centrifugal pump
Model	NS-50
Key Features	Self-priming, No foot valve needed, High flow capacity, Lightweight, Durable

Applications

Suitable Applications

- Industrial water supply
- Drainage systems
- Building construction
- Mining operations
- Agricultural irrigation
