

Fluorescent Tube Lamp

This fluorescent lamp is designed for general lighting purposes. It features a tubular shape with a white diffuser to provide even light distribution.

Product Overview

Energy-Efficient Illumination

This fluorescent lamp is designed for reliable and energy-efficient lighting across various environments, including offices, commercial spaces, and residential areas. Featuring a classic tubular design with a white diffuser, it ensures even light distribution throughout the illuminated area. The lamp operates via a gas-filled glass tube coated with phosphor, which emits light when excited by an electrical discharge, making it a standard choice for general lighting requirements.

Technical Specifications

Shape	Tubular
Technology	Fluorescent
Construction Materials	Glass Tube, Phosphor Coating

Installation and Compatibility

Compatible Systems

- Ballast-compatible fixtures
- General lighting fixtures

Electrical Connection	Dual-end contacts
-----------------------	-------------------

Application

Recommended Use

Office • Commercial • Residential
