

# Flush Mounted Network Communication Enclosure

This flush-mounted enclosure is designed for network communication. It features RJ45 ports and fiber optic adapters for structured cabling and network distribution.

## Product Overview

### Professional Network Integration

This flush-mounted network communication enclosure serves as a centralized hub for structured cabling and network distribution. Designed for seamless indoor installation, it integrates multiple data transmission ports including RJ45 and fiber optic adapters. The unit features a secure hinged door equipped with clear diagrams for efficient cable management and port identification.
