

Flyback Transformer for 25-29 inch TVs

This flyback transformer is designed for use in 25-29 inch color televisions. Its layer-wound construction improves efficiency and reduces electromagnetic interference.

Product Overview

High-Performance Flyback Transformer

This high-voltage flyback transformer is specifically engineered for 25-29 inch color television applications. It features advanced layer-wound construction designed to enhance operational efficiency while effectively reducing electromagnetic interference. Built for reliability, this component ensures stable high-voltage supply to the CRT anode for optimal image display quality.

Technical Specifications

Integrated Features

- Integrated voltage multiplier
- Focus voltage adjustment
- Screen voltage adjustment

Performance Benefits

Improved Efficiency • Reduced EMI • High Reliability

Compatibility

25-inch TVs, 29-inch TVs, Color Television

Construction

Layer-wound
