

FNC Shaft for SMT Placement Machine

This FNC shaft is designed for SMT placement machines. It ensures accurate and reliable performance in electronic assembly processes.

Product Overview

High-Precision FNC Shaft

This original, new FNC shaft is a high-quality spare component specifically engineered for SMT placement equipment. Designed for durability and precise operation, it ensures seamless mechanical performance in your assembly line. This component is essential for maintaining the operational integrity of high-speed surface mount technology systems.

Identification

Condition

Original • New

Part Number

KV8-M711S-A0X

Compatibility

Compatible Machine Series

- YV100X Series
- YG200 Series
- YS24 Series

Supported Assembly Components

Component Category	Typical Part Series
Servo Board Assy	KM5 / KGN / KKE / KHN
Driver Board Assy	KJ0 / KGK / KGN
System Unit Assy	KW3 / KGK / KHL
Vision Unit/Board	KV1 / KGJ
