

Foam Earplugs for Noise Reduction

Polyurethane foam earplugs provide hearing protection in noisy environments. The soft earplugs conform to the ear canal for a secure fit and high noise reduction.

Product Overview

Professional Hearing Protection

These soft polyurethane foam earplugs are designed for high-performance noise reduction in demanding industrial environments. Featuring a slow-rebound material, they adapt to the ear canal to ensure a secure, comfortable fit for long-term wear. The corded design provides added convenience by preventing loss during busy work shifts, making them a reliable choice for construction and manufacturing professionals.

Technical Specifications

Noise Reduction Rating (SNR)

30 dB
Noise Reduction

Certifications	EN 352-2
Material	Soft PU (Polyurethane) Foam

Design Features

Design Characteristics

- Bullet shape for easy insertion
- Slow-rebound foam for custom fit
- Low-pressure comfort
- Corded to prevent loss

Fit Compatibility	Universal fit for most ear canals
