

# Foam Paint Roller with Ergonomic Handle

This paint roller features a high-density foam cover for smooth and even paint application. It has a durable metal frame and an ergonomic plastic handle for comfortable use and includes a pre-drilled hole for storage.

## Product Overview

### Professional Foam Paint Roller

This high-density foam paint roller is engineered for consistent, professional-grade paint application across a variety of surfaces. Its design prioritizes user comfort with an ergonomic handle that minimizes fatigue during extended projects. Featuring a durable metal frame, this tool is built to withstand repeated use while providing a smooth and even finish for various coatings.

## Technical Specifications

### Handle Features

- Ergonomic design
- Durable plastic construction
- Integrated storage hole

Roller Material	High-density foam
Frame Material	Durable metal

## Usage Information

Suitable For	Paints, Coatings, Various Surfaces
