

Foldable Aluminum Alloy Hand Truck

This foldable hand truck is constructed from lightweight aluminum and sturdy plastic. It is designed for efficient material handling with a maximum load capacity of 90 kg.

Product Overview

Versatile Material Handling Solution

This foldable hand truck is designed for efficient material handling across warehouses, delivery operations, and general transportation tasks. Constructed with a durable aluminum frame and a folding steel toe plate, it balances lightweight portability with robust strength. The unit features an ergonomic design for comfortable operation and solid rubber wheels for smooth maneuverability on various surfaces.
