Overview

A portable electric bicycle designed for easy commuting and storage.

Compact Urban Mobility

This foldable electric bicycle is designed for efficient urban commuting and recreational use. Featuring a lightweight frame and a compact folding mechanism, it is easy to carry and store in tight spaces. The bike combines a brushless motor with a lithium battery for a sustainable ride, offering both electric-assisted propulsion and traditional pedaling options.

Performance

Maximum Speed	35 km/h
Range (Pure Battery)	45 km
Range (Foot Power)	80 km

Physical Attributes

The bike features a compact, foldable design suitable for urban environments.

Weight	19 kg
Wheel Size	12 inch
Foldable Design	Yes

Technical Specs

Equipped with front and rear disc brakes for enhanced stopping power and an integrated electric motor.

Detailed view of the rear wheel assembly, featuring an integrated hub motor and disc brake system.

Motor Type	Brushless
Battery Type	Lithium

Logistics

Packaging Dimensions	620x230x840 mm
Delivery Time	1-7 working days
