

Foldable Electric Commuter Bike

This foldable electric bike is designed for convenient commuting and storage. It features a lightweight aluminum alloy frame, brushless motor, and a rechargeable lithium battery.

Overview

Compact Urban Mobility

Designed for the modern urban commuter, this foldable electric bike offers a seamless blend of convenience and performance. Its lightweight aluminum alloy frame and compact folding mechanism allow for easy storage in small apartments, vehicles, or public transport. With a reliable brushless motor and efficient lithium battery, it provides effortless electric assistance for your daily travels.
