

Foldable Rolling Steel Pallet for Material Handling

This industrial steel pallet is designed with a foldable structure and smooth-rolling casters. It is ideal for moving and organizing materials in manufacturing, logistics, and distribution environments.

Product Overview

Versatile Material Handling Solution

This foldable rolling steel pallet is engineered for efficient material handling across various sectors, including the textile, laundry, and food industries. Its robust steel construction ensures long-term durability and high load-bearing capacity for sensitive goods. The unit features a space-saving foldable design and a sturdy base with smooth-rolling casters, making it an ideal choice for optimizing warehouse logistics and streamlining supply chain operations.

Design & Construction

Access Design	Horizontal 2-hinged half door
Surface Finishes	Galvanized, Powder Coated
Collapsible	Yes

Application Suitability

Suitable Industries

Textile • Laundry • Food Industry • Services • Logistics • Manufacturing

Operational Benefits

Key Operational Advantages

- One format for every case
- Protects sensitive goods
- Flexible warehouse organization
- Reduces reloading efforts
- Collapsible for space-saving storage
- Secure consignment containment
