

Foldable Steel Storage Cage with Casters

This foldable steel cage is designed for material handling and storage. It features a hinged gate for easy access and heavy-duty casters for smooth movement.

Overview

Versatile Material Handling Solution

This foldable steel storage cage is engineered for efficient material handling across the textile, laundry, and food service industries. Featuring a robust steel construction with a horizontal hinged half-door design, it ensures easy access to stored contents while maintaining security. The unit is equipped with heavy-duty casters for smooth mobility and is fully collapsible, allowing for significant space savings when not in use.
