Foldable USB Solar Charger

This portable solar charger provides a sustainable power source for electronic devices. It efficiently converts sunlight into electricity using high-efficiency solar panels and includes a USB output port.

Overview

Sustainable Power for Professionals

This portable solar charger is engineered to provide a reliable and sustainable power source for electronic devices in any environment. Featuring high-efficiency solar panels, it converts sunlight into usable electricity with ease, making it an essential tool for field work, travel, and emergency preparedness. The lightweight, foldable design ensures maximum portability without sacrificing durability, allowing it to withstand the rigors of daily use.

Technical Specifications

Device Compatibility

- Smartphones
- Tablets
- USB-powered electronics

Ideal Applications

Outdoor Activities • Travel • Emergency Situations

Output Interface	USB
Design Features	Foldable, Lightweight, Compact, Durable Construction
