Product Overview

Versatile Loading Solution

This folding loading ramp is engineered for durability and ease of use, constructed from high-strength, lightweight aluminum. Its design features a non-slip, perforated surface that ensures secure loading and unloading for a variety of wheeled equipment. The ramp conveniently folds in half for compact storage and transport, making it an essential tool for logistics and equipment handling.

Technical Specifications

Weight Capacity

600 lbs
Max Load

Dimensions

| State | Length | Width | Height/Depth |
|----------|--------|-------|--------------|
| Unfolded | 90" | 12" | 2" |
| Folded | 45" | 12" | 4" |

Features & Compatibility
