

Folding Bicycles for Commuting

Folding bicycles are designed for portability and easy storage. These bicycles have a folding frame mechanism and smaller wheels, making them suitable for commuting and recreation.

Overview

Compact Urban Mobility

These folding bicycles are engineered specifically for the modern urban commuter who values portability and efficiency. Featuring a robust folding frame mechanism, these bikes allow for seamless storage in tight spaces, making them ideal for multi-modal transit or apartment living. With their compact wheel design, they offer a nimble and convenient solution for short-distance travel and recreational riding.

Technical Specifications

Wheel Size	12 - 20 inches
Drivetrain	Simple drivetrain

Usage & Application

Key Features

- Folding frame mechanism
- Compact design for portability
- Space-saving storage

Primary Use Cases	Urban Commuting, Recreational Riding, Multi-modal Transit
