

Folding Magnifier with Integrated Scale

This folding magnifier is designed for detailed inspection and measurement. It features a high-quality optical lens, foldable design, and a built-in scale for accurate measurements.

Product Overview

Precision Inspection Tool

This folding magnifier is engineered for detailed inspection and precise measurement tasks. Its high-quality optical lens ensures clarity, while the compact, foldable design offers both portability and protection for the lens. Ideal for quality control, jewelry appraisal, and intricate assembly work, it provides a stable platform that supports hands-free operation and reduces user fatigue.

Key Features

Core Features

- High-quality optical lens for clear magnification
- Foldable design for easy transport and storage
- Integrated scale for accurate measurements
- Stable platform for hands-free operation

Applications

Recommended Use Cases

Quality Control, Jewelry Appraisal, Detailed Assembly, Precision Inspection
