

Folding Metal Roll Cage Container

This metal roll cage container is designed for efficient storage and transport in warehouses and supermarkets. It features a folding design to save space when not in use and swivel casters for easy movement.

Overview

Efficient Logistics Solution

This folding metal roll cage container is designed to streamline warehouse operations and simplify goods transportation. Its collapsible design ensures space-saving storage when not in use, while the robust steel mesh construction provides both security and visibility for sensitive cargo. Ideal for supermarkets and distribution centers, it keeps consignments organized and mobile.

Design & Features

Mobility

Swivel Casters • Easy Maneuverability

Design Type	Folding/Collapsible
Construction	Steel, Mesh Structure

Usage & Benefits

Key Benefits

- Space-saving collapsible design
- Enhanced visibility and ventilation
- Secure consignment handling
- Flexible warehouse storage

Common Applications	Supermarkets, Warehouses, Distribution Centers
