

Folding Metal Wire Mesh Roll Cage

This folding metal wire mesh roll cage is designed for efficient storage and transportation. Constructed from durable metal wire mesh, it offers excellent visibility and ventilation.

Product Overview

Versatile Logistics Solution

This folding metal wire mesh roll cage is engineered for the efficient storage and transportation of goods in demanding environments like textile facilities and laundry operations. Its design prioritizes accessibility and security, featuring a horizontal hinged half-door for easy loading and unloading. Built for durability and space efficiency, the cage folds down when not in use, making it an essential tool for streamlining warehouse and retail logistics.

Design & Construction

Door Configuration	Horizontal 2-hinged half door
Mesh Design	Close-weave mesh
Side Panel Construction	High Rigidity, Independently Mounted Structures

Operational Features

Best For

- Textile Industry
- Laundry Facilities
- Warehousing
- Retail Logistics

Storage Type

Foldable • Space-saving
