Product Overview

Versatile Loading Solution

This durable bi-fold steel ramp is engineered for safe and efficient equipment loading, providing a reliable solution for overcoming height obstacles. Featuring a high-grip mesh surface, it ensures superior traction for wheelchairs, scooters, and various small vehicles. The intelligent hinged design allows for compact storage, while integrated handles make it highly portable for use in vehicles, at home, or on the go.

Technical Specifications

Material	Durable Steel
Surface Design	High-traction mesh
Finish	Black with red safety end caps

Key Features

Core Features	Bi-fold Design, Portable, Compact Storage, Anti-slip Mesh, Integrated Handles
