

Folding Wire Mesh Roll Container

This folding wire mesh container is made with a zinc-plated, anti-rust design and a knock-down structure. It is equipped with heavy-duty casters for clever storage and transport.

Product Overview

Versatile Material Handling Solution

This folding wire mesh roll container is designed to optimize warehouse space and streamline material handling operations. Its collapsible structure allows for efficient storage when not in use, while the robust wire mesh construction provides durability, visibility, and ventilation for sensitive goods. Ideal for diverse logistics environments, this unit minimizes handling damage by allowing goods to be loaded once and transported seamlessly from receiving to the final destination.

Key Features

Operational Benefits

- Collapsible design for space-saving storage
- One-time loading reduces handling damage
- High mobility with smooth-rolling casters
- Uniform external dimensions for consistent warehouse planning
- Excellent visibility and ventilation via mesh construction

Design Flexibility

Yes

Custom Design Availability

The design can be tailored based on customer's specific real-world usage requirements.
