

Food and Beverage Processing Machine

This industrial machine is designed for processing food and beverage products. It features a cylindrical chamber and a horizontal screw press, suitable for large-scale production.

Overview

Industrial Processing Solution

This robust industrial machinery is specifically engineered for large-scale food, beverage, and cereal processing applications. Featuring a heavy-duty construction with a distinct green finish, the system integrates a cylindrical upper chamber for mixing or processing with a high-performance horizontal screw press or extruder. Designed for durability and continuous operation, this equipment provides a reliable solution for demanding production environments.

Technical Specifications

Key Components

- Cylindrical processing/mixing chamber
- Horizontal screw press
- Extruder assembly

Machine Type	Food and Beverage Processing / Screw Press Extruder
Construction	Heavy-duty industrial grade
Drive System	Motorized, Gearbox Equipped

Application

Industry Suitability

Food Processing • Beverage Production • Cereal Processing
