

Food and Beverage Processing System

This industrial machinery is designed for food and beverage processing. It features stainless steel construction and a complex piping system.

Overview

Industrial Processing System

This high-capacity industrial processing system is engineered specifically for the food, beverage, and cereal production sectors. Constructed from durable, high-grade stainless steel, the unit ensures hygienic operation and longevity in demanding large-scale manufacturing environments. The system features an integrated multi-tank configuration and a complex, precision-engineered piping network designed for efficient fluid and material handling.

Technical Specifications

Tank Configuration

- Tank BON 02
- Tank BON 03

Material Composition

Stainless Steel

Suitable Industries

Food Processing, Beverage Production, Cereal Processing

Performance Metrics

Scale

Large-Scale Production
