

Food and Beverage Processing Tank

This industrial machinery is designed for processing food and beverages. It features a cylindrical tank mounted on a sturdy frame with pipes, valves, and a motor assembly.

Overview

Industrial Processing Efficiency

This industrial-grade processing tank is engineered specifically for food, beverage, and cereal manufacturing environments. Featuring a robust cylindrical design mounted on a heavy-duty frame, it is built to withstand rigorous daily operations. The system includes integrated mechanical controls, including a motor and flywheel assembly, ensuring precise process management and reliable performance for high-volume production lines.

Technical Specifications

Primary Applications

- Food Processing
- Beverage Production
- Cereal Manufacturing

Operational Features

Heavy-Duty • Industrial Grade • Integrated Gauges

Construction Type

Cylindrical Tank on Frame

Drive Mechanism

Mechanical Drive, Motorized, Flywheel Assembly
