

# Food and Cereal Single Screw Side Feeder

This single screw side feeder features a side feeder and top feed with a movable hopper and platform. It is designed for food, beverage, and cereal processing applications.

## Product Overview

### Precision Feeding Solution

The SLJ-50E is a specialized single screw side feeder designed for high-efficiency material handling in food, beverage, and cereal processing environments. It features a versatile dual-feed configuration, allowing for both side feeding and top feeding to accommodate various ingredient types. With its robust construction and integrated movable hopper and platform, this system provides the flexibility and reliability required for modern production lines.

## Technical Specifications

Model	SLJ-50E
Feeding Mechanism	Single Screw, Side Feed, Top Feed

## Design Features

### Mobility & Setup

- Movable Hopper
- Integrated Platform

## Applications

### Target Industries

Food Processing • Beverage Production • Cereal Processing
