

# Food and Chemical Blenders

These blenders are designed for use in both food processing and chemical applications. Two models are available, one with a stainless steel jar and the other with a glass jar.

## Product Overview

### Versatile Blending Solutions

These professional-grade blenders are engineered for both food processing and chemical application environments. Available in two distinct configurations, they offer durability and precision control for consistent mixing results. The design features a robust silver-colored base with intuitive manual control, ensuring reliability in demanding operational settings.

## Technical Specifications

### Available Models

Model	Jar Material
KF-803S	Stainless Steel
KF-803G	Glass

### Application Compatibility

Food Processing • Chemical Mixing

### Design Features

Stainless Steel Base, Manual Control Knob, Secure Top Lid
