

Food and Grain Cleaning Machine

This machine is designed for cleaning and sorting grains and food products. It features a robust frame with a hopper and a screening mechanism.

Product Overview

Industrial Cleaning Solution

This food and grain cleaning machine is engineered for high-efficiency processing within the food, beverage, and cereal industries. It features a robust, industrial-grade metal frame designed to withstand continuous operation in demanding environments. Equipped with specialized intake hoppers and advanced screening mechanisms, this unit ensures precise separation and cleaning of grain materials for consistent quality output.

Technical Specifications

Equipment Type

Grain Cleaner • Separator • Industrial Machinery

Industry Application

Food Processing, Beverage Production, Cereal Processing, Grain Handling

Construction Material

Industrial-grade metal

Key Performance Metrics

Performance Highlights

1 Cleaning/Separation

Processing Stage
